

Statement of safety for our customers and the public:

December 9, 2011

DO NOT ALLOW STRANGERS ACCESS TO YOUR HOME

Please be advised that North Atlantic Petroleum is not currently conducting air quality testing in customer homes. If a person should come to your door claiming to be a North Atlantic representative, please ask for an ID. Safety is top priority for North Atlantic and we want to remind our customers and the public to never let someone you don't know, or are not expecting, into your home.

Today North Atlantic received information from the RCMP that there have been reports of a male in a blue van going door-to-door identifying himself as Mr. Penton of North Atlantic Petroleum. Apparently, the male is attempting to gain access to homes by saying that he needs to do air quality control testing.

Residents are warned not to allow this male into their home. Anyone with information regarding this male is asked to call the Bay St George RCMP at (709) 643-2118.
